2. 於 2022 年與美國德州大學 E.Allen Emerson 教授(Turing Award 2007)、加州大學聖塔芭芭拉 Oscar H. Ibarra 教授、以色列 Bar Ilan 大學 Doron A. Peled 教授、賓州大學 Insup Lee 教授、台大電機顏嗣鈞教授合作創建 ATVA (Automated Technology for Verification and Analysis) 國際會議，並擔任指導委員會 (Steering Committee) 主席至 2022 年為止。期間每年尋找主辦單位，並協助建議經費規劃。歷屆主辦都市為 Taiwan (2003-2005), Beijing (2006), Tokyo (2007), Seoul (2008), Macao (2009), Singapore (2010), Taiwan (2011), Thiruvananthapuram (2012), Hanoi (2013), Sydney (2014), Shanghai (2015), Chiba (2016), Pune (2017), Los Angeles (2018), Taiwan (2019), Hanoi (2020), Gold Coast (2021), Beijing (2022), and Singapore (2023). 如今 ATVA 已經成長為環太平洋區最重要的自動驗證技術國際研討會，每年參與人數多達百餘人。自 2022 年，初始指導委員會成員大多退居顧問委員會(Advisory Committee)，並持續參與每年會議組建事項。
3. 2010 年擔任第四屆 4th IEEE TASE (Theoretical Aspects of Software Engineering) 國際研討會 general chair。
4. 2016 年擔任第 13 屆 ICTAC (International Colloquium on Theoretical Aspects of Computing) 國際研討會 general chair。
5. 於 2010-2020 年擔任 FMSD (International Journal on Formal Methods in System Design), Springer-Verlag (SCI extended) 之副編輯。
6. 2003/2004 年擔任 IJFCS (International Journal of Foundations on Computer Science, World Scientific Publishing Co., SCI extended) 之客座編輯。
7. 2018 年與 Augusto Sampaio 共同擔任 Theoretical aspects of computing 國際期刊之客座編輯。
8. 2010 擔任 IEEE TASE (Theoretical Aspects of Software Engineering), 2010, Taipei, Taiwan, ROC 議程委員會主席。
9. 2005 擔任第 25 屆 IFIP FORTE (International Conference on Formal Techniques for Distributed and Communication Systems) 議程委員會主席。
10. 2003/2004 年擔任 ATVA 國際會議議程委員會 (共同) 主席。
11. 1999 擔任 RTC'1999 (International Workshop on Real-Time Constraints) 之議程委員會主席。教授電腦科學、資工基礎課程〈作業系統〉與〈編譯器技術〉多年，錄製 Youtube 影片，

將臺大基礎教學成果廣為傳播。

12. 技術授權臺大專利，成立新創〈穎韜資訊股份有限公司〉，目前天使輪募資中。

賀!! 本院58名教師入榜2023年全球前2%頂尖科學家榜單~

■ 2024-10-04 李信賢

由美國史丹佛大學今年發表2023年「全球前2%頂尖科學家榜單 (World’ s Top 2% Scientists)」，本院共有58名教師入榜2023年「全球前2%頂尖科學家 (World’s Top 2% Scientists)」名單(計算含該專任助理教授)。該名單分為「終身科學影響力 (Career-long Impact)」及「年度科學影響力 (Single-year Impact)」兩個類別；本院入榜「終身科學影響力排行榜 (1960-2023)」之教師51名，「2023年度科學影響力」之教師25名，其中18位教師同時入榜兩個名單，故總計有58名教師入榜。屆時本院傑出學術研究成果與貢獻受到國際肯定。

「全球前百分之二頂尖科學家榜單 (World’ s Top 2% Scientists)」，由美國史丹佛大學置於全球最大的引文測量資料庫Scopus所建立，並由Elsevier 旗下 Mendeley Data 公佈。根據總引用次數、單篇作品、單篇或單一作者或6篇關鍵指標評分，篩選出世界排名前2%的頂尖科學家。分析數據更新數據至2023年底，使用截至2024年10月所有Scopus作者來計算，篩選出世界排名前2%的頂尖科學家，涵蓋22個主要學科和174個子領域。最終將「終身科學影響力排行榜 (1960-2023)」，以及「2023年度科學影響力排行榜」進行榜單。

Keynote Speech: 10th International Congress on Engineering and Information (ICEAI), Nov. 21, 2024, Taipei, Taiwan.

Title: As AI is competing for programmers' jobs, what shall we programmers do? From a software testing researcher' s perspective.

Abstract: KOL are warning that programmers' job opportunities will be eliminated by AI. More and more development teams prompt AI for program templates. In this trend, although less and less programmers will be needed, job opportunities for requirement engineers and program QA engineers will become stronger than ever. In this speech, we discuss how software test teams may adapt to and benefit from the huge opportunity of AI technology. Finally, we present a new product concept and a business model for software testing service in the AI era.

TASE 2010 Foreword

Welcome to TASE 2010, the Fourth IEEE International Symposium on Theoretical Aspects of Software Engineering.

TASE is forum for the presentation and discussion of new fundamental ideas in software engineering of large-scale systems. Software engineering of such systems has usually been viewed as the study of principles, guidelines, and empirical rules. To manage the complexity of large-scale software projects, various theories have been proposed. Such theories focus on, but are not limited to, the following subjects:

- Real-Time and Embedded Systems
- Semantics
- Model Checking
- Specification and Security
- Software Testing
- Software Models
- Verification
- Concurrency.

The past three TASE symposiums were successfully held in Shanghai (2007), Nanjing (2008), and Tianjin (2009). This year the symposium takes place in Taipei.

The TASE 2010 program includes 22 regular and tool papers and short presentations. We are grateful to our invited speakers, Jean-Raimond Abrial from ETH Zurich and Michael Gerard Hinchey from the University of Limerick, Ireland.

We would like to thank our sponsors:

- National Taiwan University, Taiwan
- Research Center for Information Technology Innovation , Academia Sinica, Taiwan
- Institute of Information Science, Academia Sinica, Taiwan
- National Science Council, Taiwan
- Ministry of Education, Taiwan
- IEEE Computer Society.

We would also thank our external reviewers for the special efforts made to help review and select the program for TASE.

Preface

FORTE (Formal Techniques for Networked and Distributed Systems) 2005 was sponsored by Working Group 6.1, Technical Committee 6 (TC6) of the International Federation for Information Processing (IFIP). The conference series started in 1981 under the name PSTV (Protocol Specification, Testing, and Verification). In 1988, a second series under the name FORTE was started. Both series merged to FORTE/PSTV in 1996. The conference name was changed to FORTE in 2001. During its 24-year history, many important contributions have been reported in the conference series. The last five meetings of FORTE were held in Pisa (Italy), Cheju Island (Korea), Houston (USA), Berlin (Germany), and Madrid (Spain).

The 25th FORTE was held from Sunday to Wednesday, October 2–5, 2005 on the beautiful campus of the National Taiwan University (NTU), Taipei, Taiwan, ROC. The scope covered formal description techniques (MSC, UML, Use cases, ...), semantic foundations, model-checking, SAT-based techniques, process algebras, abstractions, protocol testing, protocol verification, network synthesis, security system analysis, network robustness, embedded systems, communication protocols, and several promising new techniques. In total, we received 88 submissions and accepted 33 regular papers and 6 short papers. All submissions received three reviews. The final program also included 3 keynote speeches, respectively by Prof. Amir Pnueli, Dr. Constance Heitmeyer, and Prof. Teruo Higashino, and 3 tutorials, respectively by Prof. Rance Cleaveland, Dr. Constance Heitmeyer, and Prof. Teruo Higashino. The proceedings also include the text of the keynote speeches. In addition, there were social events, including a reception, a banquet, and an excursion.

FORTE 2005 was co-located with ATVA (Automated Technology for Verification and Analysis) 2005 with a two-day overlap. Prof. Amir Pnueli was the joint keynote speaker. The participants of FORTE 2005 and ATVA 2005 also enjoyed a joint banquet/reception and a joint excursion.

FORTE 2005 was organized under the auspices of IFIP TC 6 by the Department of Electrical Engineering, NTU. It was generously supported by the National Science Council, Taiwan, ROC; the Ministry of Education, Taiwan, ROC; the Institute of Information Science, Academia Sinica, Taiwan, ROC; the Center for Information and Electronic Technologies, NTU; the Graduate Institute of Communication Engineering, NTU; and the Computer and Information Networking Center, NTU.

We would like to thank the Steering Committee members of FORTE for all their suggestions, guidance, and assistance. We also owe a lot to all the Program Committee members and reviewers for their effort in compiling rigorous reviews. Prof. Manuel Nunez deserves special thanks for unselfishly passing on his experience as organizer of FORTE 2004. We would also like to thank Prof. Jin-Fu Chang, Prof. Chuan Yi Tang, Prof. Wanjiun Liao, Prof. Sy-Yen Kuo, Prof. Ming-Syan Chen, Dr. Churn-Jung Liao, and Dr. Ching-Tarn Hsieh for their assistance. Finally special thanks go to Ms. Lih-Chung Lin, Ms. Tz-Hua Chen, Mr. Rong-Shiung Wu, and Mr. Zawa Chu for their energetic and careful planning in the local arrangements and webpage management.

主旨: RE: November Taipei Keynote Speaker – (NS)

Hi, dear Joanna:

I think International Congress on Engineering and Information (<https://iceai.org/>) seems more appropriate for me. But Global Conference on Engineering and Applied Science (<https://gceas-conf.org/>) also is OK. The title of my keynote speech, abstract, and short bio are in the following.

Title: As AI is competing for programmers' jobs, what shall we programmers do? From a software testing researcher's perspective.

Abstract:

KOL are warning that programmers' job opportunities will be eliminated by AI. More and more development teams prompt AI for program templates. In this trend, although less and less programmers will be needed, job opportunities for requirement engineers and program QA engineers will become stronger than ever. In this speech, we discuss how software test teams may adapt to and benefit from the huge opportunity of AI technology. Finally, we present a new product concept and a business model for software testing service in the AI era.

Bio:

Professor Farn Wang obtained his Ph.D. degree from the Computer Sciences Department, University of Texas at Austin, USA. He obtained a BS. degree from National Taiwan University, Taiwan and a MS. degree from National Chiao-Tung University, Taiwan. He is interested at model-checking and software testing technology. He was the Steering Committee chair of International Symposium on Automated Technology for Verification and Analysis (ATVA) from 2003 to 2022 and an Advisory Committee member of ATVA from 2022. He was also an Associate Editor of the journal of Formal Method in System Design (FMSD), Springer from 2013 to 2021.

Dear Professor Wang Farn,

Thank you for your email.
Your message is noted, and we sincerely appreciate your cooperation.
Should you have any questions, please feel free to let me know.

Thank you

Sincerely,
Joanna

Dear Professor Wang Farn,

I hope this email finds you well.

Could you please let us know when we can expect to receive your professional biography and photo?

If your abstract is not yet ready, kindly inform us, as we are still in the call for papers stage.

Having your information available on the website would be extremely helpful.

Thank you for your attention to this matter.

Should you have any questions, please feel free to let me know.

Thank you
Sincerely,
Joanna

Dear Professor Farn,

Thank you for your email.

I apologize for the delayed response. It is challenging for us to reply to emails during events.

In the future, please let us know in person, and we will do our best to accommodate your request.

Additionally, we would be honored if you would consider joining our conference in Taipei this November as a keynote speaker.

If you are interested, we will be happy to provide you with more details.

Should you have any questions, please feel free to let us know.
