QUIZ (2021/04/21)

Open-book, open-internet, no discussion

Name: _____ Department : _____ Student ID: _____

Suppose we have the following sorting program.

```
def sort(L):  
    R = []  
    for each k in L:  
        if k not in R:  
            length = len(R)  
            i = 0  
            while True:  
                if i >= length or (i < length and R[i] > k):  
                    R.insert(i,k)  
                    break  
    return R
```

Program 1

1. Considering the program 1 in the above, please write down the test input values of parameter L to achieve RACC.

2. Continuing from problem 1, please write down the test input values of parameter L to achieve CACC.

3. Continuing from problem 1, please write down the test input values of parameter L to achieve GICC.

4. Continuing from problem 1, please write down the test input values of parameter L to achieve RICC.

5. Considering the following program.

```
def sort2(L):  
    R = []  
    for each k in L:  
        if k not in R:  
            i = 0  
            while i <= len(R):  
                if i >= len(R) or R[i] > k:  
                    R.insert(i,k)  
                    break  
                i += 1  
    return R
```

Program 2

Please write down the test input values of parameter L to achieve RACC.

6. Continuing from problem 5, please write down the test input values of parameter L to achieve CACC.

7. Continuing from problem 5, please write down the test input values of parameter L to achieve GICC.

8. Continuing from problem 5, please write down the test input values of parameter L to achieve RICC.
