100.00

Recipient Name

Delivery Address

Credit Card#

Expiration Date

Read the Contract of Purchase

☐ I agree the contract of puyrchase.

Submit
the
Order

1. Considering the GUI of the shopping cart GUI in page 1, please present your test data scheme by writing down one or more characteristics of your choice for each input element. Note that your characteristics must enable the test input of both valid and invalid test data.

2. Continuing from problem 1, please write down blocks of each test input element.

3. Continuing from problem 1, please write down a test data set for Each-Choice (EC) coverage.

4. Continuing from problem 1, please write down a test data set for Pairwise (PW) coverage.

5. Considering the following matrix multiplication procedure for any pair of matrices of any dimension.

`def matrixMult(A, B):`

Please write down your choice of characteristics of A and B that enables both invalid and valid the test data.

6. Continuing from problem 5, please write down blocks of each test input element.

7. Continuing from problem 5, please write down a test data set for Each-Choice (EC) coverage.

8. Continuing from problem 5, please write down a test data set for Pairwise (PW) coverage.
